Polyaspartic Floor Solution

Polyaspartic flake floor epoxy coating is a great solution for businesses or homeowners who need to have their floor taken care of efficiently and effectively. Unlike basic or standard epoxy coatings, most of our Polyaspartic flake floor epoxy coatings can be installed in less than one full day, even in low temperatures, making them a convenient choice when you don't want to lose time or money waiting on your floor to cure. With a seamless, high-performance. Polyaspartic flake floor, you won't need to waste time buffing, polishing, or re-sealing to maintain the floor at your residence or industrial/ commercial facility. Our floors resist staining from automotive fluids and other harsh chemicals.

ADDITIONAL GARAGE ACCESSORIES

Garage Lifts

Four Post Lifts

- Uses more floor space than a two-post lift, but raises to a similar height.
- A more stable choice for lifting trucks and large vans.
- Faster vehicle positioning with drive-on / drive-off capability.
- Good for alignment, but requires rolling air jacks and turnplates.
- A mid-range cost alternative.

Scissor Lifts

- Uses less floor space than a four-post lift but raises to a similar height.
- Good stability and easier all-round vehicle access with no posts.
- Faster vehicle positioning with drive-on / drive off capability.
- Good for alignment, but requires rolling air jacks and turnplates.
- Slightly higher in cost but has no cables and pulleys to maintain.

Options Available

Two Post Lifts

- Uses the least floor space, but might require a 12' ceiling height.
- Raises a vehicle approximately 72" with wheel free capability for under car servicing (tires, brakes, oil change, muffler, etc.).
- Not the most stable choice for lifting trucks and large vans.
- One of the lowest cost alternatives

Single Post Lifts & Car Staker Lifts
